

ANALYSIS OF REPORT BY: _____

TOTAL _____/100

Title

- variables
- response
- species binomial /4

Abstract

- Sections represented:
- introduction
 - materials and methods
 - results
 - discussion /8

Introduction

- introduces topic
- variables
- purpose statement /18

Materials & Methods

- brief outline
- not imperative
- orderly
- essential details
- calculations described /20

Results

Graphs & Tables

- straightedge used
- alignment/spacing correct
- leading 0's present
- labels on axes
- units on axes
- legend present
- all necessary figures present
- calculated values in ballpark
- supportive text
- past tense
- additional observations
- no conclusions here /24

Discussion

- deep analysis of results
- no new data presented
- comparisons to knowledge
- related to natural conditions
- limitations estimate /20

Literature Cited

- textbook cited
- journal article cited
- citation forms correct /6
